Experienced Developer with B.Sc. in Software Engineering.

- ◆ Highly knowledgeable in developing with: JavaScript, HTML5, CSS3, ReactJs, Nextjs.
- ◆ Logical thinking and systemic vision and ability to design and build a system independently.
- ◆ Ability to meet complex technological challenges, orientation for new technologies, fast learning and proven ability to work on several projects simultaneously.
- ◆ Demonstrated work experience in the team and individually - in work and projects in various frameworks, with good human relations.

WORK EXPERIENCE

October 2022 - March 2023: Web Developer at Tahaluf Al Emarat Technical Solutions in UAE (Remote)

- ◆ Building an E-commerce site for clothing brands.

EDUCATION

2018 - 2022: B.Sc. in Software Engineering from Jordan University of Science and Technology in Jordan

GPA: 3.14 out of 4

- ◆ **Main courses:** Web, applications development, Client server programming, Software engineering for web applications
- ◆ **Technologies:**
 - Languages:** JavaScript
 - Front-end:** HTML5, CSS3, Reactjs, Nextjs
 - Backend:** Nodejs, Express, Prisma
 - Databases:** MongoDB, Supabase (Postgres)
- ◆ **Projects:**
 - ecommerce:** a front end React.js application which uses react hooks and redux.
 - Tools:** Visual code.
 - Technologies:** React.js, typescript

The wild oasis: A dashboard application for hotel which keep track on guests and cabins you can (add, remove, update and delete) entities like (cabins, guests...)

Technologies: React by using (custom hooks, reactQuery,...) as frontend and Supabase as backend and database.

Tools: Visual code

Final project - Bug Tracking System: a backend system which tracks bugs on organizational level you can (add, remove, update delete) entities like (projects, bugs, features, organizations, members ...)

Technologies: MongoDB, Express, Node.js

Tools: Visual code, Postman, MongoDB Compass

Full-Stack Developer – MYA Boutique:

Developed a modern e-commerce platform, "Mya Boutique," using Next.js for the front-end, ensuring fast and responsive performance with a seamless user experience.

Implemented database schema using Prisma, optimizing data management, and ensuring smooth integration with the front-end components.

Utilized Supabase for backend services, including real-time databases, authentication, and file storage, ensuring secure and scalable operations.

Employed React Query for efficient data fetching, caching, and synchronization, improving application performance and user experience.

Managed application state using Zustand, simplifying state logic and enhancing app scalability.

Optimized the platform for SEO and mobile responsiveness, enhancing discoverability and usability.

Managed the full development lifecycle, from planning and wireframing to deployment and ongoing feature updates.
